how to install stair make-over stair cladding laminate treads and risers quick guide

this quick guide showing the basics of how to install stair make-over stair cladding laminate treads and risers is a supplement to and should be read in conjunction with our stair make-over general installation guide which can be downloaded from our web site www.stairmakeoversolutions.co.uk

stair makeover stair cladding laminate treads and risers carry a heavy domestic / general commercial rating
they are durable, hygienic easy to clean and virtually maintenance free, specially developed to make taking laminate flooring upstairs easy, practical and affordable stair make-over will look as good as new for years to come and is suitable for almost any style and layout of wooden, concrete or metal staircase

important

we have taken every care in writing and producing this how to guide but can not accept any responsibility for it's appropriateness in individual circumstances and if you have any doubts at all please do not undertake your project without first consulting a qualified trades person.

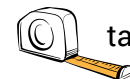

only stair make-over adhesive and sealant should be used and applied as directed

there are potential safety issues if stair make-over is fitted incorrectly and you should be sure of your ability to complete the project safely before undertaking any work.

if in any doubt whatsoever consult a qualified trades person before undertaking any work

how to install stair make-over stair cladding laminate treads and risers – quick guide

handy hints

the stair make-over stair cladding system consists of just 3 basic elements allowing you to clad virtually any staircase with premium quality laminate treads and risers with the minimum of fuss and disruption

- 1 single piece bull nose treads – available in six laminate wood effect finishes
- 2 reversible risers – on one side matching wood effect as treads and plain cream on the other side (the cream side also provides a great surface to facilitate painting in a colour of your choice)
- 3 top stair pack – allowing easy transition to landings

all the elements are simply cut to size for an exact fit and glued in place with the specially formulated adhesive onto your existing wooden, metal or concrete staircase

It really is as easy as 1 2 3

- 1 prepare your staircase by removing any carpet or other covering on it and sanding any paint finish to provide a keying surface for the adhesive
- 2 measure and cut your stair make-over laminate treads and risers to size then glue them in place starting at the bottom of the staircase and working to the top finishing with the top stair profile
- 3 seal edges with colour matched sealant stand back and admire your new durable, hygienic, easy to clean and virtually maintenance free staircase knowing it will look as good as new for years to come
