## transform a staircase in a day

simply clad an existing staircase with our premium laminate or real oak veneer treads and risers to create a stunning feature staircase

# how to install

## Maestro steps

### on open tread staircases

We do all we can to ensure the accuracy of the advice given but we can not cover all eventualities and it is the installers responsibility to ensure the safe and secure installation of the products in each individual situation-if in doubt consult a professional

if you have open treads on your staircase then the Maestro steps range has been designed to provide everything needed for a professional finish including tread side covers and an open stair profile for the back of the treads

#### Installing side covers

once you have cut your tread to the required size measure and cut the MDF fillet supplied to fit. apply some glue and clamp gently in place (wipe off any excess glue with a damp cloth) and allow to dry fully before sanding to provide a key for the edging strip then simply glue on the side cover which is colour matched to your tread..

1. riser
2. tread
3. top stair to landing transition pack
4. open staircase profile
5. side cover
6. connecting springs

this is one of a series of installation guides which cover all aspects of installing Maestro-steps stair cladding all of which are available to download from our website  
[www.stairmakeoversolutions.co.uk](http://www.stairmakeoversolutions.co.uk)

The open stair profile really completes the look of an open tread staircase ensuring the original staircase is not seen at the back of the staircase

#### Installing the open stair profile

measure the width of the back of your open staircase and saw the open stair profile to size fix into place
