the stair makeover solutions company

## transform a staircase in a day

simply clad an existing staircase with our premium laminate or real oak veneer treads and risers to create a stunning feature staircase

# how to install Maestro steps on winders and spiral staircases

We do all we can to ensure the accuracy of the advice given but we can not cover all eventualities and it is the installers responsibility to ensure the safe and secure installation of the products in each individual situation-if in doubt consult a professional

Each Maestro steps tread is supplied with a measuring sheet on the reverse of the packing sheet and this may be useful to measure your winders or spiral stairs

It can be used to create a template for each winder tread or if you prefer measure in the standard way

## Joining two treads together

Maestro steps treads are designed to be deep enough to cover the majority of applications, however on some stairs with very wide winding stairs a standard tread may not be deep enough

## Installing the connecting springs

don't worry, it's very easy to join an additional piece to extend a tread.  
simply glue the MDF connecting spring supplied into the rebate on the back of the tread you need to extend.

then take either , an offcut from a tread you have already cut to size, or alternatively cut the bullnose from a new tread apply some glue to the rebate and push the two treads together.

wipe off any excess glue immediately, and apply several strips of masking tape across the joint to prevent movement during drying.

once dry simply measure, cut and install just like any other tread.

1. riser
2. tread
3. top stair to landing transition pack
4. open staircase profile
5. side cover
6. connecting springs
